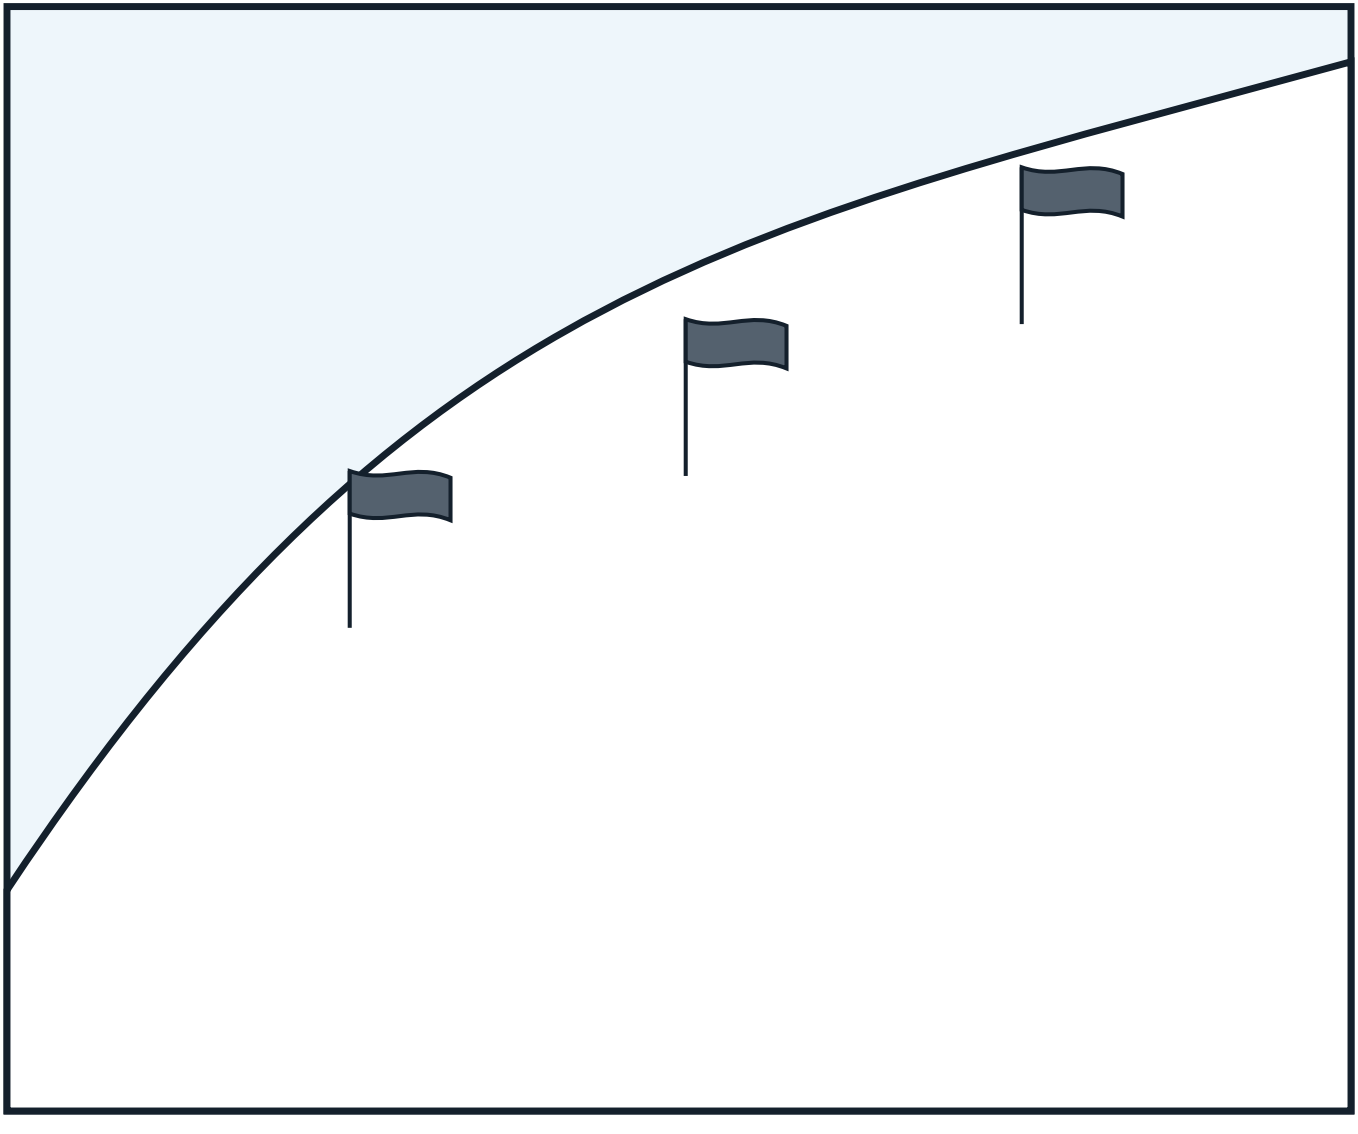
How to Play

Ski jumping's modern rules include the most literal body-regulation in sport: your skis' length is set by your weight.

The Playing Area



Good to Know

Moments That Shaped the Game

- 2004 — The BMI Rule (Ski Length by Body Weight): The FIS tied equipment to the body: ski length is capped as a percentage of a jumper's height, but jumpers below a minim.
- 2010 — Wind and Gate Compensation: From the 2010 era the FIS formalised compensation: anemometer data converts wind into points added or deducted per jump,.

Rules That Changed the Game

- 2004 — The BMI Rule (Ski Length by Body Weight): Eating-disorder incentives in jumping are structurally blunted, the BMI check is a routine part of equipment control, and the rule.
- 2010 — Wind and Gate Compensation: The little wind/gate figures beside modern jump scores are this rule at work; arguments now are about the formula's calibration, n.
