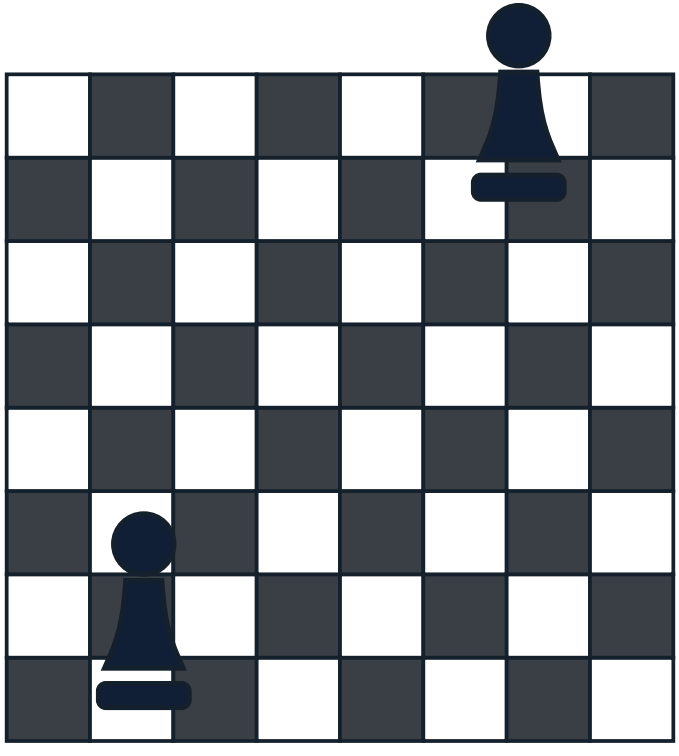
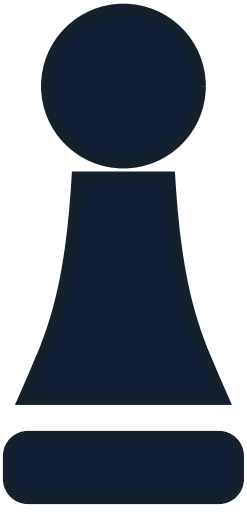
Meet Mock Draft Simulator!

Run a real draft: pick your team and slot, the board drafts the rest.

Where It Is Played



The Gear



Meet the Mind & digital Family

- Esports — Competitive video games from League of Legends to Counter-Strike.
- Chess — FIDE-governed mind sport with a world championship.
- Fantasy Sports — Manage virtual rosters; season-long and dynasty formats.
- RoboCup — Robot soccer research league aiming to beat human champions by 2050.
- Robot Combat — Remote-controlled armoured robots fight in an arena.
- Air Hockey — Fast puck game on an air table.

How to Play

Nine runnable drafts across five leagues (2027 NBA, NFL, NHL, WNBA and MLB; 2028/2029/2030 NBA; 2028 NFL), each from the site's published big boards. Choose a team and a slot; the computer drafts the rest by the board, and the page lists the leagues it honestly does not carry — including the NWSL, whose draft was abolished by its 2024 CBA.

Scoring

- Your class is graded against the board you drafted from.

Top Tips

- BPA (best player available) is the board's doctrine: reaching for need is how the simulator's grades fall.
- In the multi-year NBA drafts, the classes' depths differ wildly — trading down in a shallow year is the board's own verdict, rendered as a grade.
- Read the honest list at the bottom of the page before complaining about a missing league: some leagues have no draft, and the page says which, and why.
